Before you start to use Seamokey Mail Merge feature, you have to Check whether you install the Plug in or not. As the Mail Merge Is a add-on app.

If your Seamonkey has not install Mail Merge, you should install it first.

Here is the instruction :-

Re: FW: Weekly Data File to M	larsto	n -	Inbox - jchen@wspc.com.sg - SeaMonkey		
<u>File E</u> dit <u>V</u> iew <u>G</u> o <u>M</u> essag		ool	s] <u>W</u> indow <u>H</u> elp		
Set Msgs Compose Repl) 1 y		Search <u>M</u> essages Ctrl+Shift+S <u>S</u> earch Addresses		
View: All			Message <u>F</u> ilters		
Name I			<u>R</u> un Filters on Folder Run Filters on Messa <u>g</u> e		
■ Exambox			R <u>u</u> n Junk Mail Controls on Folder D <u>e</u> lete Mail Marked as Junk in Folder		
			Import		
		2	Data <u>M</u> anager o Password Manager ag Download Manager Ctrl+J ag		
			Add-ons Manager Ctrl+Shift+A		
			Set Up Sync		
			Web Development		
Territoria Electronica Electronica			Switc <u>h</u> Profile JavaScript Debugger <u>n</u>		

click "Restart now" to restart the Seamonkey

After the installation, you might need setup an account which taking care of all the emails in and out.

Here is some idea for creating dummy email account :-

https://intranet.wspc.com.sg/instruction/SetupFakeEmailAccount.pdf

If you can not get it, you can call MIS for help.

Now you need definitely setup a SMTP for sending out the mail merge things, the following is just a simple outline to setup.

Email

Read messages	Mail & Newsgroups Account Settings					
Compose a new message	▲jchen@wspc.com.sg Server Settings Copies & Folders Composition & Addressing Lunk Settings	Outgoing Server (SMTP) Settings Although you can specify more than one outgoing server (SMTP), this is only recommended for advanced users. Setting up multiple SMTP servers can cause errors when sending messages.				
Accounts 1 View settings for this account Create a new account	Junk Settings Disk Space Return Receipts Security WCS Server Settings Copies & Folders Composition & Addressing Junk Settings Disk Space Return Receipts Security Local Folders Junk Settings Disk Space Outgoing Server (SMTP)	smtp.wspc.com.sg (Default) Add Edit Remove Set Default				
Advanced Features		SMTP Server				
Search messages Manage message filters		Description: For Mail Merge Server Name: mail5.wspc.com Port: 25 Default: 25 Security and Authentication 5 Connection security: None Authentication method: No authentication User Name: OK Cancel				
	Add Account Set as Default Remove Account	OK Cancel <u>H</u> elp				

Before start to use "Mail Merge", you must have a list which has at least "Name" and "Email Address" columns (fields) inside.

As Seamonkey or Thunderbird only accept CSV file, so you need export your list to CSV file.

how to get or convert a CSV file?

Here is steps

Excel :-

Open the file, from the main menu, select

"File-->Save as...", from the file type, pick CSV

Access :-

Use "Export", it will save as a ".txt" file. You need to rename the file name from "aaaa.txt" to "aaaa.csv". (the following page has instruction)

😑 Export Text Wizard

1

This wizard allows you to specify details on how Microsoft Office Access should export your data. Which export format would you like?

X

Advanced...

Delimited - Characters such as comma or tab separate each field

Fixed Width - Fields are aligned in columns with spaces between each field

Sample export format:

Export Text Wizard × What delimiter separates your fields? Select the appropriate delimiter and see how your text is affected in the preview below. Choose the delimiter that separates your fields: (Comma O Tab Semicolon Space Other: Include Field Names on First Row Text Qualifier: -Make sure you are select same items which shown in red box "TitleID","TITLE","Inhouseeditor","AcgEditor","Grade"," 5543, "PATH INTEGRALS IN QUANTUM MECHANICS, STATISTICS, 5162, "QUANTUM ASPECTS OF BEAM PHYSICS, 18TH ADVANCED IC 5386, "ADVANCES IN COASTAL AND OCEAN ENGINEERING, VOL 8 5166, "SENSORS AND MICROSYSTEMS - PROCEEDINGS OF THE 6TH 5544, "TEXTBOOK OF CLINICAL OPHTHALMOLOGY, A: A PRACTICA -٠

Cancel

< Back

Next >

Finish

Now, you can start to use Mail Merge feature :-

Step by Step: (CSV)

Create a New Message ("File -> New -> Message") Add the Variable(s) to To, e.g.: {{Mail}} or {{FirstName}} {{LastName}} <{{Mail}}> Add the Recipients to Cc (optional) (variables are supported) Add the Recipients to Bcc (optional) (variables are supported) Add the Subject (variables are supported) Add the Body (variables are supported) Add the Attachments (optional) Click "File -> Mail Merge" Select "CSV" and check "Deliver Mode" and "Format" Add (individual) Attachments (optional) (variables are supported) Select "Filename" and check "Character Set", "Field Delimiter" and "Text Delimiter" Check "Start", "Stop" and "Pause" (optional) Click "OK"

The Draft Message is saved as Template in your Current Account and for each Recipient a New Message is automagically saved in your Outbox ("Local Folders -> Outbox"). Ready for Delivery: "File -> Send Unsent Messages"
